

USB Modem “Network Registration” Procedure

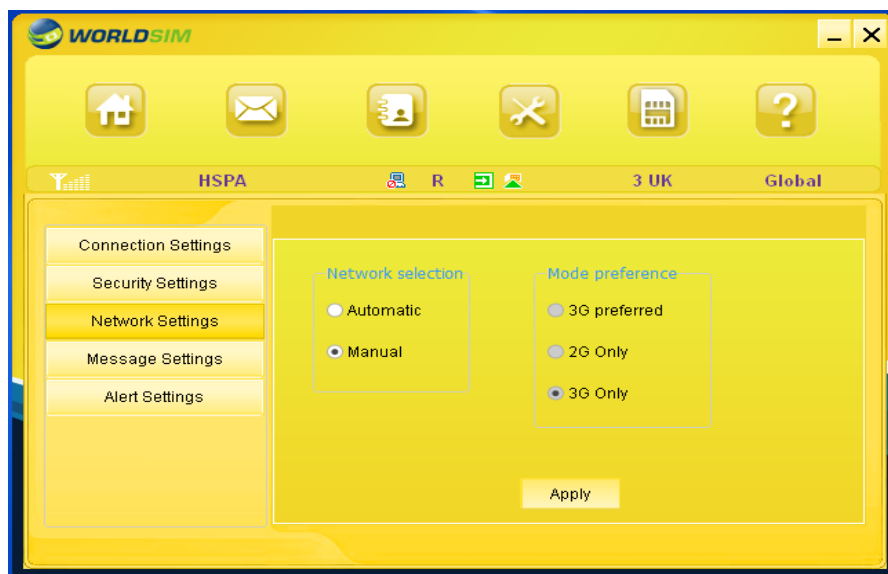

Please only use the below procedure if user experiences a Network Registration issue.

A network registration issue would only happen when a user is unable to connect to a particular network in a specific country. As per the screen shot below the selected section would appear blank.

Please go to the Settings menu, by clicking on the Settings button (4th button on the Top Hand Navigation) > Network Settings

- Network Selection = Manual
- Mode Preference = This would normally be set to 3G Only as default however if user has the option then ask them to select 3G preferred.
- Click on Apply

Click on the Home button, and connect to the default profile WorldSIM.
